**MEASURING INSTRUCTIONS**

The following are measuring instructions for the SportScreen retractable screen system for ToyHaulers and Cargo Trailers. If you should have any specific questions about your application please call technical support at: 800-431-2986.

1. Measure the opening height of the unit and provide the measurement below.
2. Measure the inside **wall to wall** width of the unit and provide the measurement below.
3. The Sport Screen mounts between the back frame and any drop down bed that is in the unit. Ensure that there is enough room along the side walls to mount a 2" L-channel bracket. (look for any electrical outlets or switches that may interfere)
4. The canister that houses the rolled up screen is a 3"x3" box. Ensure that there is enough room between the back frame and any drop down bed so when the bed is in its "up" position that the canister can be mounted in between or above the upper limit of the bed.
5. Please indicate whether or not the unit has a dovetail on the back of the opening.

Measuring Back Door Opening

**UNIT INFO**

|  |   |  |
|--|---|--|
| <b>OPENING HEIGHT:</b> _____<br>Unit height is the daylight opening of the back door. From the floor to the top frame of the gate. | <b>Please provide information about the unit that the SportScreen is being installed on.</b><br><br><b>MANUFACTURER:</b> _____<br><br><b>MODEL:</b> _____<br><br><b>YEAR:</b> _____ | <b>UNIT DETAILS:</b><br><br>Does the unit have a dovetail going off the back floor on to the back gate? <input type="checkbox"/> YES<br><br>If there is a drop down bed next to the back gate there needs to be at least 4" of room from the back wall to the drop down bed. |
